

# Energy Benchmarking for Faith Buildings

\*Energy efficiency is the fastest, cheapest, and largest single resource solution for saving energy, saving money, and preventing GHG emissions.

Faith & The Common Good is partnering with organizations in your region to help faith communities achieve their sustainability goals.

## Benefits to your faith community:

- ✓ Save \$\$ on your energy bills (natural gas and electricity)
- ✓ Conserve water, reduce waste, create a more comfortable faith building
- ✓ Fight climate change by reducing green house gases
- ✓ A more engaged faith community

## The next steps we can take together:

Faith & the  
Common Good
